What we do:

- Workplace safety audits, to determine compliance status and identify potential safety issues
- Prepare compliance documents required for Hazard Communication, emergency response, lockout/tagout, confined space, PPE, and respiratory protection
- Evaluate workplace safety issues in order to determine risk and liability
- Develop workplace safety incentive programs
- Conduct ergonomic evaluations
- Evaluate equipment for proper storage/labeling
- Design safety warning labels and evaluate machine guarding

Workplace Health & Safety

Goldman Environmental Consultants, Inc. (GEC) is experienced in designing cost-effective workplace safety programs. Our staff is trained to develop health and safety plans to reduce employee exposure risk and achieve compliance objectives. GEC can help your company tackle regulatory challenges, employee health concerns, and reduce future corporate liability while working within your budget.

OUR APPROACH TO WORKPLACE HEALTH & SAFETY

Workplace health and safety regulations often change. GEC will help your company navigate these regulations in a cost-effective manner so that no employee has to work in an unsafe environment. Companies may undergo increased scrutiny from the public regarding their employee workplace exposures and conditions. GEC will help strike a balance between worker safety and associated costs through a client-specific risk-management plan.

Workplace safety and employee health affect all companies. GEC confronts the complex relationship between different regulations, employee health, productivity, and costs to your company in a logical manner. Our multi-perspective approach is used to develop a holistic approach to each workplace's specific safety and compliance need. GEC appreciates the challenges faced by the pace of rapid technological change and will develop strategies to respond accordingly.

GEC'S METHOD

GEC will work with key personnel from your company to better understand your corporate structure, management responsibilities, employee constraints, and operational issues to develop a plan to match your objectives. These deeper understandings of your operations help GEC to integrate and customize your strengths and weaknesses into effective compliance and safety programs.

GEC'S EXPERIENCE

GEC has extensive experience in compliance documentation, auditing, management and staff training, exposure monitoring programs, indoor air quality evaluations, product liability analyses, and workplace safety evaluations. We have conducted the aforementioned tasks for clients around the country. With our multi-disciplinary background and multi-faceted approach, our staff has experience in a wide range of industry sectors, including manufacturing, biotechnology, healthcare, communications, chemical manufacturing, food preparation, education, and electronics. This knowledge gives GEC the unique capability to implement cost-effective safety programs across a variety of industries.
